Que T. Le
Primary Examiner

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a position and/or movement sensor for measuring a position or movement of a first object relative to a second object, among other features, comprising a measuring device including a first member coupled to the first object; a second member coupled to the second object; a first spring arrangement with at least one spring element coupled between the first and second members; at least one stop member for limiting movement of one of the members; and a second spring arrangement with at least one second spring element coupled between the first member and the first object, wherein a spring constant of the second spring arrangement is greater than a spring constant of the first spring arrangement in at least one linear direction or about at least one pivot axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1) Yabusaki et al 6,044,938 disclose a dual-mode drum brake assembly having a plurality of spring arrangement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Que T. Le whose telephone number is (571) 272-2438.

Art Unit: 2878
